

The "Next Generation"

The Next Generation of Freight Elevator Doors

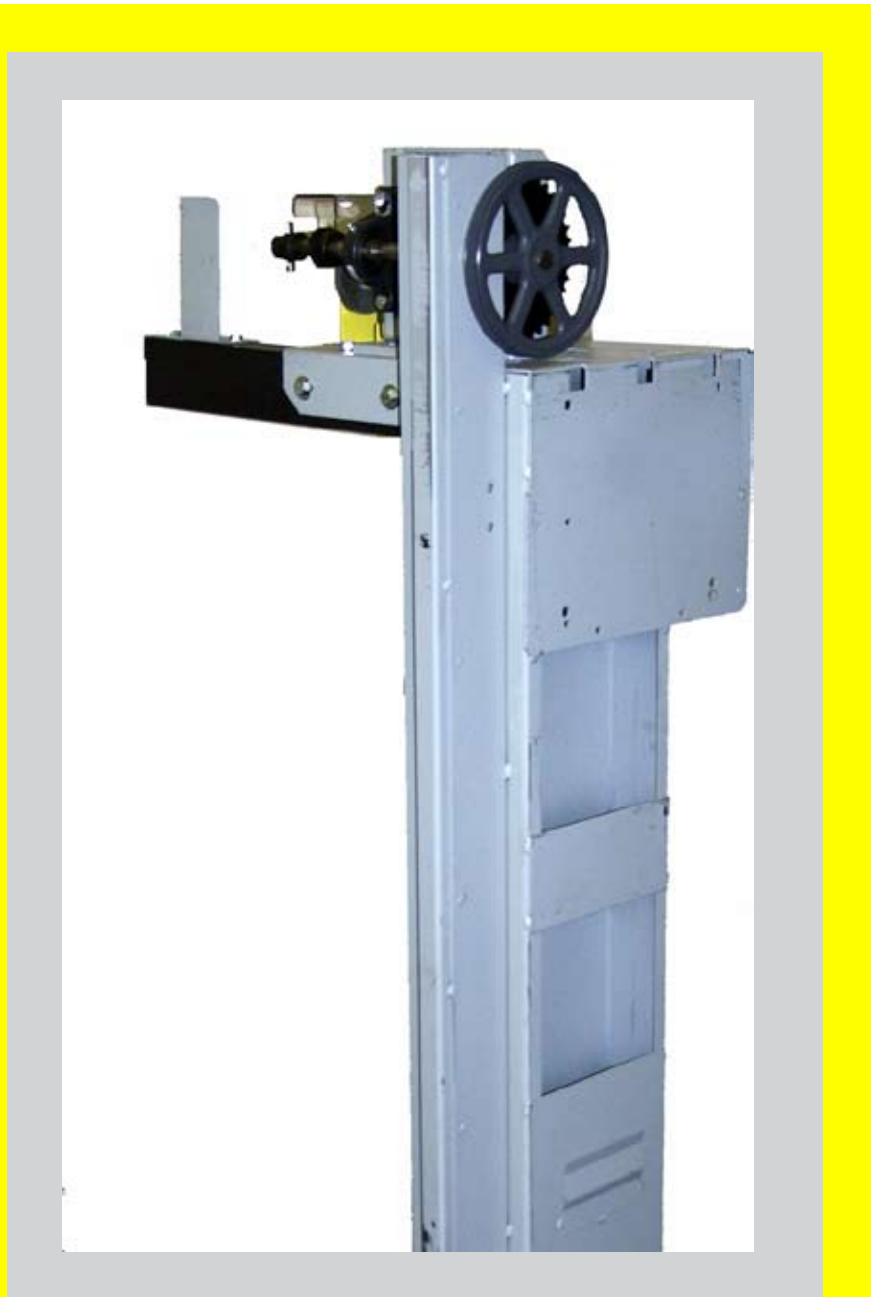

Gate Column Assembly

Courion's new "Q" Style Gate Columns and Cross Drive Unit ship in three (3) factory-assembled pieces. This insures less handling, faster installation, and better operation.

Factory Assembled. The Gate Columns combine the weights, chains, gate guides and mounting bracket in one simple to install unit. All adjustments are made at Courion prior to delivery.

Balanced Operation. The "dual stack" design assures a balanced operation and eliminates gate racking during gate travel.

Fewer Parts. The Cross Drive Unit is a solid, single piece cross drive bar that does away with the crossover chains and sprocket assemblies. The Cross Drive is easy to adjust and mounts directly to the Gate Drive Unit utilizing keyless bushings and coupling tubes.
